PROFESSIONAL SUMMARY

Cybersecurity graduate and application developer with hands-on experience in vulnerability assessment, secure web deployment, and published mobile apps. Released Nexom and Fieldflow to Google Play while building a strong foundation in Windows and Linux environments, networking, troubleshooting, and technical documentation.

TECHNICAL SKILLS

Operating Systems	Windows 10/11, Windows Server fundamentals, Linux (Ubuntu, Kali)
Security & Networking	TCP/IP, packet capture and traffic analysis, firewall rule analysis, vulnerability scanning, system hardening, CSP, HSTS, least-privilege design
Development	HTML, CSS, JavaScript, Python, Bash, Java, SQL, mobile app feature design, debugging, and data persistence
Tools & Platforms	Nessus Essentials, Wireshark, pfSense, Kali Linux toolset, Metasploit (introductory), John the Ripper, GitHub, Netlify

SELECTED PROJECTS

Nexom

Published on Google Play

- Published a social media app to Google Play with privacy-aware account design.
- Added Bluetooth family pairing and separate adult and teen account experiences.

Fieldflow

Published on Google Play

- Published a note-taking app that saves information across devices.
- Focused on simple note creation, persistence, and retrieval workflows.

Cybersecurity Portfolio Projects

Windows 11 and Web Security

- Used Nessus Essentials to scan a Windows 11 system, remediate findings, and validate results through rescans.
- Deployed a static site with CSP, HSTS, X-Frame-Options, and Permissions-Policy, then verified live response headers.
- Configured and hardened Linux and Windows lab systems while applying networking and defense-in-depth concepts.

Education

Old Dominion University

Norfolk, VA

Bachelor of Science in Cybersecurity | Conferred May 16, 2026

Minor: Information Systems and Technology | GPA: 3.0

Relevant coursework: Cybersecurity Operations, Networking & Security, System Security, Ethical Hacking, Cryptography, Cyber Law

Experience

Team Associate, Walmart

Norfolk, VA | 2023 - Present

- Provided direct customer support and handled inventory and logistics workflows in a fast-paced environment.
- Built communication, teamwork, and process-discipline skills that transfer well to IT and security roles.
