Professional Summary

CompTIA Security+ certified cybersecurity student with hands-on experience in vulnerability assessment, system hardening, firewall configuration, and secure web/mobile application deployment. Strong foundation in Windows and Linux security and defensive security practices. Seeking a junior IT, SOC analyst, or security operations role.

Certifications

CompTIA Security+ (SY0-601)

Certification ID: 001ded3971a14b159494e3201be73ef8

Valid: February 8th 2026 – February 8th 2029

Technical Skills

Operating Systems: Linux (Ubuntu, Kali), Windows 10/11

Networking: TCP/IP, firewall configuration, packet capture analysis (ICMP, TCP, TLS)

Security Tools: Nessus Essentials, Wireshark, pfSense

Development & Security: Ionic React, Firebase (Authentication, Firestore security rules), secure deployment (GitHub, Netlify), security headers (CSP, HSTS)

Programming: Python, Bash, SQL

Projects & Technical Experience

Secure Application Development & Deployment

- Built and deployed a real-time group communication application using Ionic React and Firebase
- Implemented Firebase Authentication and structured Firestore security rules
- Designed role-based access controls to restrict unauthorized data access
- Published and managed application configuration through Firebase Console

Vulnerability Assessment & System Hardening

- Conducted vulnerability scans using Nessus Essentials on Windows systems
- Identified and remediated configuration weaknesses including SMB signing issues
- Implemented registry-based hardening controls
- Validated remediation through re-scanning and documented risk reduction

Education

Old Dominion University — Norfolk, VA
B.S. Cybersecurity (Expected Spring 2026)
Minor: Information Systems and Technology | GPA: 3.02

Employment Experience

Team Associate — Walmart — Norfolk, VA

June 1st, 2023 – February 20th, 2026

- Delivered customer support in high-volume environment
- Operated inventory and logistics systems accurately
- Followed documented procedures and compliance workflows
