IT Support: Active Directory (labs), Windows / Windows Server, Microsoft 365, macOS troubleshooting
Command Line: Windows Command Prompt, PowerShell; ipconfig, ping, tracert, nslookup

Technical Projects & Support

Account Access & Connectivity Labs — Old Dominion University *Aug 2022 – May 2026*

- Investigated sign-in failures by reviewing account settings and group membership, then resetting passwords or correcting permissions as needed to restore authorized access.
- Isolated connection problems by checking address settings, testing network reachability, and tracing the connection path to distinguish local configuration errors from wider network issues.
- Installed applications and patches, checked functionality, and recorded symptoms, attempted fixes, and unresolved issues so the next person could continue without repeating completed checks.

FieldFlow — Android & Web Application *Personal Project*

- Developed FieldFlow for Android and web, combining notes, calendar reminders, saved links, and maps to organize daily information in one application: view FieldFlow.
- Configured Firebase authentication and backend security rules; reset passwords, disabled accounts, and removed users to control application access and support account recovery.

Portfolio Website & Windows Security Assessment *Personal Projects*

- Developed and deployed a responsive HTML, CSS, and JavaScript portfolio through GitHub and Netlify; tested browser interactions and verified security headers to support usability and secure delivery.
- Assessed a Windows 11 host with Nessus Essentials, reviewed findings, and documented remediation and validation results to identify security weaknesses and track corrective work.

Customer Service & Hands-On Support

Cross-Trained Retail Associate — Walmart Supercenter *Jun 2023 – Feb 2026*

- Maintained professional, dependable service in a high-pressure retail environment for nearly three years, balancing competing customer needs, adapting across departments, and coordinating with coworkers and supervisors during busy shifts.

Device Troubleshooting & Live Event Support *Informal / Event Support*

- Troubleshoot Windows and Apple devices for friends, explaining fixes in clear language to help them resume using their equipment.
- Provide audio-visual support for services and events, drawing on approximately 11 years of experience setting up equipment and resolving connection issues to keep live programs running.

Education & Certification

Bachelor of Science in Cybersecurity; Minor in Information Technology — Old Dominion University, May 2026
CompTIA Security+ — Active through February 2029
